PERFECT PACKAGING

A range of cups, containers and accessories for refreshments on the move

1. CUSTOMISED CUPS

Benders by Design is a range of 15 off-the-shelf paper cup designs to showcase Benders Paper Cup Company's print service capability. The designs can be kept as they are or personalised to include an operator's own logo or branding. The service features the company's Attribute hot cup created specifically for the upscale coffee to-go market. Its insulation properties mean the cup can be held comfortably for over three minutes without having to be put down, making it 30 times more effective than a standard single-wall cup without the need for "double cupping". The range incorporates 4oz hot cups and 8/9oz, 12oz and 16oz premium hot cups.
